## Switching pattern of the lights of the holder.

Juhul kui lampide A+B+C koguvõimsus ületab 280 W tuleb juhtmesarja võimalikke signaali juhtmeid (A/B) kasutada täiendavaks maanduseks! Erinevate laternate võimalik samaaegsete lülituste arv väheneb.

If the total wattage of the headlights A+B+C exceeds 280 W, the signal cables of the wiring harness (A/B) must be used as additional grounding! The number of possible simultaneous switching of different headlamps is decreasing.

Если общая мощность фар A+B+C превышает 280 Вт, сигнальные кабели жгута проводов (A/B) следует использовать в качестве дополнительного заземления! Количество возможных одновременных переключений различных фар уменьшается.

Falls die Gesamtleistung der Scheinwerfer A+B+C 280 W übersteigt, sind die eventuellen Signalkabel des Kabelbaums (A/B) als zusätzliche Erdung zu verwenden! Die Anzahl möglicher gleichzeitiger Schaltungen verschiedener Scheinwerfer verringert sich.
